

SUMS PRESENTS: MATH MOVIE NIGHT

Screening This Friday:

The Imitation Game

**PIZZA
POPCORN
CANDY
SNACKS
AND
MORE!**

A biographical drama about Alan Turing, a 20th-century mathematician who is often credited as the father of the modern computer. He played a key role in cracking the Enigma, a cryptographic device used in World War II, which many believe shaved years off of the war and saved countless lives.

There will also be a short pre-talk starting at 5:30 discussing Turing's contributions to the field of cryptography.

MAY 19TH 6PM
